Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

1. This Office action is in response to amendment filed 3 March 2003, which papers have been placed of record in the file.

2. Claims 1-8 are allowed over the prior art of record. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to disclose or suggest a method for controlling a magnetic disk drive comprising moving the head using VCM BEMF, amplifying the information read from the magnetic disk and processing it, again stopping power supply to the head amplifying functions, and then changing the direction moving the head using VCM BEMF, as presented in the environment of claims 1 and 5.

The prior art of record fails to disclose or suggest a magnetic disk drive comprising amplifying, after the idle seek operation, the information read from the magnetic disk and obtaining information concerning the position of the magnetic head, and then changing the direction of the idle seek operation, as presented in the environment of claim 6.

The prior art of record fails to disclose or suggest a magnetic disk drive comprising a processing unit wherein the processing unit can set a target velocity, the magnetic disk drive executes an idle seek operation by using the VCM BEMF without amplifying the information read from the magnetic disk, and amplifies, after the idle seek operation, the information read from the magnetic disk, to obtain information concerning the head position, and then to calibrate a velocity of said

idle seek position, as presented in the environment of claim 7 and argued in applicant's amendment pp. 9-10.

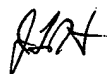

The prior art of record fails to disclose or suggest a magnetic disk drive comprising a magnetic disk with 8000 cylinders, where the direction of the idle seek is reversed when the magnetic head is in a range from the 0th to 500th cylinder and in a range from the 7500th to 8000th cylinder on the disk, as presented in the environment of claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
